A Life with Camera

RED LABEL is a brand created to support the lifestyle of those who appreciate high quality products and enjoy work and leisure to the maximum. Combining outstanding functionality and quality, RED LABEL products satisfy the needs of professional camera users and come in a variety of colors that enrich various occasions and settings.
**RED LABEL is**

[Introduction] A new brand called RED LABEL is launched by ARTISAN & ARTIST, a Japanese brand, which embodies outstanding craftsmanship without compromising to the demand of artists. While maintaining the unchanged sound quality of ARTISAN & ARTIST, RED LABEL is designed for active people who enjoy an urban lifestyle.

[Concept] RED LABEL is a brand created for use at various occasions and settings by people who enjoy their camera life. It offers sophisticated, urban and casual designs while guaranteeing not only the functionality that camera users expect but also the highest level of quality as the conventional ARTISAN & ARTIST products.

[Name] RED stands for “Re-Engineered Design”, and at the same time, symbolizes the active, aggressive, challenging and energetic image that the color RED has.

---

**Material**

CORDURA nylon is used as a main fabric for the bags. This densely woven, high-strength fabric provides maximum durability, long-lasting performance and water resistant benefits. The fabric also features enhanced tear and abrasion resistance, making the bags a perfect fit for a variety of uses.

Fine and smooth leather is used to enhance the texture. The discreetly embroidered logo is a stylish decorative accent.

---

**EASY SLIDER System**

The shoulder strap uses the Easy Slider system (registered utility model) which enables quick and easy length adjustment. Just slide the D-ring with your finger to shorten or lengthen the strap in one movement.

*When used as a camera bag, we recommend carrying the RED LABEL bags on your right shoulder as it is easier to access the equipment without having to take off the bag from your shoulders completely.*
Special Features

Size

The bag's capacity can be changed by adjusting the hook's position. It can be locked quickly.

Strap with a multipurpose pocket

[RDS-AC320] The multi-purpose pocket is made of special elastic material and secured by a zipper to carry small accessories.

Tape and Ring Type Attachment

While it is a tape attachment strap, it can be also attached to ring type camera by attaching the ring part with leather protection flap.

We reserve the right to make changes in specifications, range of products, and suggested retail price without advance notice.
The **Sling bag** combines comfort and fast access to its contents at the same time. The wide shoulder strap reduces the strain of carrying the bag and makes it comfortable to carry it for long periods of time. The bag is suitable for an outdoor photo session or any outdoor activity.

A single lens reflex camera (middle model) and one additional lens can be stored inside. It is recommended to load equipment from the left or right side of the bag as the top part is designed for personal items. The 10mm thick inner case securely protects the items inside. The inner partitions are fastened with Velcro tape, making it easy to detach them and customize the inner case to suit the camera and accessories.

The cushioned compartment can hold a laptop up to 13 inches.

To reduce the strain of carrying the bag, the shoulder strap is affixed with a thick pad. It is possible to carry the bag either on left or right shoulder as the lower part of the shoulder strap can be detached and fixed accordingly.

The inner partitions can be positioned according to the side on which the bag is carried.

The shoulder strap uses the Easy Slider system (registered utility model) which enables quick and easy length adjustment. Just slide the D-ring with your finger to shorten or lengthen the strap in one movement.

The rear side of the bag is made of mesh material and is provided with a thick pad which helps the bag to fit to the body better and to reduce the strain of carrying the bag.

By removing the inner case, the camera bag becomes a casual bag.
This fitting body Messenger bag is convenient to wear when riding either a bike or a motorcycle. It is easy to take your belongings in and out of this bag, and with its many adjustable features, it can be adapted for a variety of occasions.

A single lens reflex camera (middle model) and two additional lenses can be stored inside. The 10mm thick inner case securely protects the items inside. The inner partitions are fastened with Velcro tape, making it easy to detach them and customize the inner case to suit the camera and accessories. The cushioned compartment can hold a laptop up to 13 inches.

There are two front pockets with zippers.

To reduce the strain of carrying the bag, the shoulder strap is affixed with a thick pad. The shoulder strap can be detached, and with changing the inner partitions position, the bag can be carried on either the left or right shoulder.

The shoulder strap uses the Easy Slider system (registered utility model) which enables quick and easy length adjustment. Just slide the D-ring with your finger to shorten or lengthen the strap in one movement.

The rear side of the bag is made of mesh material and is provided with a thick pad which helps the bag to fit the body better and to reduce the strain of carrying it.

By removing the inner case and closing the external side zippers, the bag can also be used as a thin casual bag. The bag's capacity can be changed by adjusting the hook's position.
This **Backpack** provides substantial space to carry professional-level equipment. The backpack is designed to prevent unused space, be compact while transporting, provide protection for the equipment and be highly functional. It can be used for a photo shooting trip with secure protection for the equipment inside.

The cushioned compartment can hold a laptop up to 13 inches.

The front zippered section is designed to store equipment. Depending on the position of the inner partitions, the bag can hold a single lens reflex camera (middle model) with a lens attached and three additional lenses as a maximum capacity.

The 10mm thick inner case will firmly protect the equipment. The inner partitions are fastened with Velcro tape, making it easy to detach them and customize the inner case to suit the camera and accessories. The removable safety net is provided to protect the equipment from falling out.

The upper part of the bag is designed for personal items. There are two inner pockets with zippers.

To reduce the strain of carrying the bag, the shoulder strap is affixed with a thick pad.

The rear side of the bag is made of mesh material, and is provided with a thick pad which helps the bag to fit the body better and to reduce the strain of carrying the bag.

The belts on the left and right of the bag serve to reduce the size of the bag, when necessary, and also can be used for holding a small tripod when travelling. The bag capacity can be changed by adjusting the hook’s position.

### Camera Pouches

These Camera Pouches have a folding top part, and the amount of storage space can be changed by adjusting the hook’s position. The partition can be removed and when the camera body is placed inside, it functions as a bottom plate. There is a zippered pocket on the rear side. Because the pouches have a top handle, it is easy to be taken out from a bag, and convenient to carry around.

The **Strap** is made of soft tape, and is pleasant to the touch. Because the tape is quite wide, it reduces the strain of carrying the camera. It can be also used for single lens reflex camera. The strap is made to be narrower by folding the side parts of the strap inwards to feel more comfortable to the hands.

The strap consists of two different color acrylic tapes laminated together. The color combinations are stylish and easily match the latest fashions. The strap is compatible with mirrorless cameras. The strap is made of soft tape; pleasant to the touch. Because the tape is quite wide, it reduces the strain of carrying the camera. It can be also used for single lens reflex camera.
